

M20 Network is a new collaborative effort. Working in partnership with WorkerSprings and other local organizations, our goal is to double the number of employers participating in the JfL network by the end of 2024. The outcome has a three-fold impact: (1) providing job-seekers more opportunities to find a job across incremental industries, job-levels, and locations, (2) giving additional employers access to well-trained and motivated candidates, and (3) helping communities alleviate homelessness and grow economically.

**Call to Action:** Join the M20 Network. This initiative brings you into the fold to find new talent, give back to your community, and be a part of God's redemptive work in the marketplace. Joining this network costs you nothing. By becoming a part of the network you get to participate in an initiative that will transform lives and have an overall impact on communities.

**Next Steps:** Once you've decided to join (or learn more about) the program, Jobs for Life's Chief Executive Officer will set up time to onboard your company into the program. After going through initial registration and training using the WorkerSpring system, JfL will share candidates for your open roles and partner with you from beginning-to-end to ensure a smooth recruiting, interview, and new hire process. Additional details will be shared upon enrolling in the program.

*We believe in relational community and transformation, and hold firm to the belief that change can truly happen when we all work together.*
